

Academic Mentoring

Academic mentoring is a key component of the academy day. Every student has one member of staff assigned to them (the academic mentor) to oversee their development both academically and more widely who they see every day at the end of the day.

The role of the the academic mentor is varied and includes:

- Acting as the main point of contact between home and the academy
- Motivating and rewarding students and working with students to identify any barriers to learning and supporting them to overcome them
- Offering students guidance on their social, emotional, physical and mental wellbeing
- Guiding students to unpick the weekly “word of the week”
- Developing students numeracy and literacy by support guided reading and numeracy activities
- Providing students with careers information through the weekly World of Work activities where students learn about a range of jobs from fashion buyer to mechanical engineer
- Developing students wider cultural capital through the weekly quiz

A full programme of activities is delivered to all students according to the following weekly timetable below

YEAR 7
